

BJOG: An International Journal of Obstetrics & Gynaecology calls for papers on infections in pregnancy

BJOG is inviting submissions of manuscripts for an upcoming themed issue to address infections during pregnancy. This themed issue is slated to publish in January 2022.

The editors are interested in research with a special focus on:

- Epidemiology and socio-economic impact of recent pandemics, including SARS-COV2, Zika virus and influenza
- New pathophysiological insights into maternal infections during pregnancy and fetal congenital infections
- Diagnostics and influence of artificial intelligence in detecting congenital infection and its long-term effects
- Qualitative influences of pandemics on medical staff and what we have learned for future breakouts
- Re-emergence of past common infections (e.g. Syphilis) and their present-day impact
- Medical anthropology and history of past infections – Societal behavior and past insights

Submit your research today: <https://mc.manuscriptcentral.com/bjog>

Please select 'BJOG 2022 Themed Issue – Infections in Pregnancy' on submission.
